

Breathe  
in the  
fresh air

YOU DESERVE

#### WINDOW AND DOOR SCREEN STOPS POLLENS

PollenTEC is a 100% European premium polyester window and door screen that allows fresh air to flow indoors while filtering out pollens. PollenTEC fabric has an intricate spun weave with a patented coating that attracts pollen spores like a magnet.

PollenTEC is a technologically advanced breakthrough for those who suffer from airborne allergies. Until now, allergy sufferers could not open windows and doors and breathe in the fresh air you so rightly deserve. Now you can.

The benefits of PollenTEC are many including an overall healthier and cleaner indoor environment.

Like no other.

#### A SMART CHOICE

- Ultimate protection for any indoor environment
- Healthier indoor air quality
- Energy efficiency through less use of air conditioners
- A cleaner home
- Adds value to your home
- Peace of mind for the whole family

## WINDOW & DOOR SCREEN HVAC AIR FILTERS

*Clean Air* SOURCE

Testing of PollenTEC fabric has been done by the European Centre for Allergy Research Foundation (ECARF) and test results verified that: 100% of grass pollens, 99.71% of birch pollen, 93.1% of stinging nettle pollen, and 90.9% of ragweed pollen were captured by the PollenTEC screen.

Because of the intricate weave and patented coating, PollenTEC stops other harmful airborne microscopic particles providing a fresher, healthier, cleaner indoor environment. With PollenTEC installed on your windows and doors and a PollenTEC Air Filter in your furnace, you have ultimate long life protection for your home and family.

PollenTEC is certified by ECARF as well as holding ASHRAE Merv 7+ rating for the air filter. The Air Filters are washable and reusable and with care will last for many years. PollenTEC is easy to care for and provides superb performance, durability, value and long life. Like no other.
